Leo Chan

Johnston, Rhode Island | leojchan@bu.edu | (401) 215 – 3495 | www.linkedin.com/in/leochan121303

EDUCATION

Boston University **Boston, MA**
M.S. in Applied Data Analytics *Exp: May 2028*
Stony Brook University **Stony Brook, NY**
B.A. in Economics *Dec. 2026*
Relevant Coursework: *Data Analysis, Econometrics, Public Finance, Industrial Organization*
Honors & Awards: Presidential Merit Scholarship, Dean's List

TECHNICAL SKILLS

Analytics & Querying: SQL, Python, R, Advanced Excel
BI & Visualization: Tableau, Power BI, Interactive Dashboard Design, Executive Data Reporting, Business Intelligence
Statistical Modeling: Exploratory Data Analysis (EDA), Hypothesis Testing, Linear/Logistic Regression, A/B Testing Concepts, Causal Inference
Data & AI Tools: Supabase (PostgreSQL), Git, GitHub, VS Code, Vercel, Prompt Engineering

PROJECTS

Economic Indicator Analysis & Empirical Data Imputation
R, RStudio, Econometrics, Statistical Data Cleaning

- Designed and executed a statistical data-imputation framework in R, increasing analytical data completeness from 74.16% to 97.72% for reliable executive reporting.
- Applied logarithmic transformations and regression diagnostic tests to resolve skewness, ensuring model validity and interpretable elasticity estimations.
- Synthesized statistical regression outputs into actionable administrative reporting decks, facilitating evidence-based decision-making for university decision-makers.

Consumer Credit Default Risk Model
SQL, Python (Pandas, Scikit-Learn), Tableau, Excel

- Developed a credit default evaluation process using Python and SQL to systematically assess risk parameters and support structured decision-making
- Segmented records into tiered risk categories, optimizing approval workflows and mitigating potential default losses
- Communicated risk assessment metrics and model accuracy to key stakeholders using ROC/AUC diagnostics and operational reporting frameworks

EXPERIENCE

Department of Asian and Asian American Studies at Stony Brook University **Stony Brook, NY**
Teaching Assistant *Jan – Dec 2025*

- Designed and maintained a centralized Excel-based grade analytics system for 20+ students per section, automating performance tracking and eliminating administrative reporting discrepancies.
- Executed quarterly cohort trend analysis on score distributions to pinpoint learning bottlenecks, enabling data-backed curriculum optimization with department faculty.
- Restructured practice workflows based on empirical performance metrics, driving a 15–20% average increase in student quiz scores across the academic year.
